Review Fragmenta Books Platform

When ask for authentication

Please remove the requirements for the identification when click on collection. Only asks identification when the user arrives in 4 points:

- Click to view the attachments of a collection
- Click to schedule a video call
- Click on the button participate on an open book collection
- Click on the button buy now on a secondary transfer

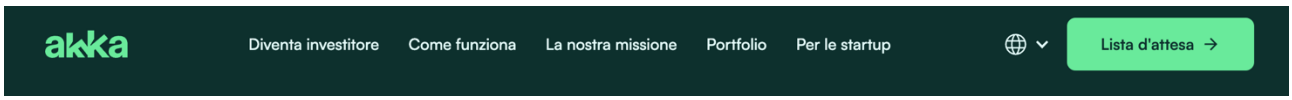
Apart for this, the user must see everything without registration

Main Menu and Footer

Remove “Contacts” page

“Vetting” becomes “Evaluation Process”

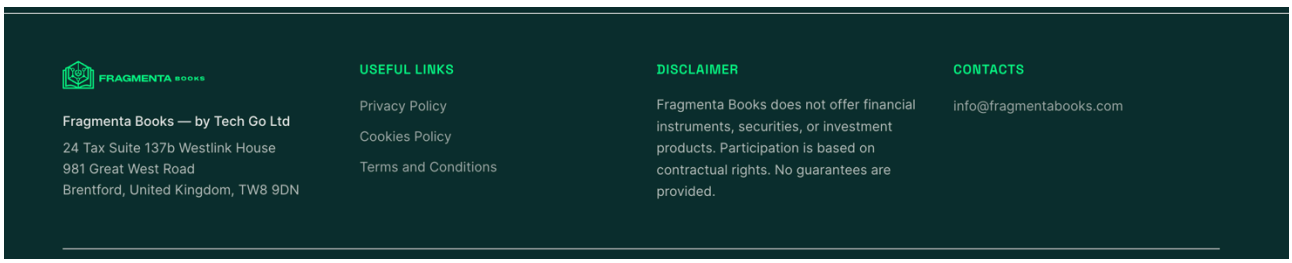
“Open Book Collections” highlighted, as final voice before “Connect Wallet”. Like in this example for “Lista d’attesa”



Also, font should be bigger, ad also a bit bigger the logo. Basically, everything a bit bigger in the current menu.

Also, please check the menu on mobile when you click to open it: the colors appear very bad, they don’t work that colors with the white background. Please adjust the graphic of the menu mobile. Open Book Collections should be in the same last position and highlighted too, like the desktop.

For the footer: please remove “© 2026 Fragmenta Books. All rights reserved.” Also, the footer below should be inserted in ALL pages of the platform.



Open Book Collections (page)

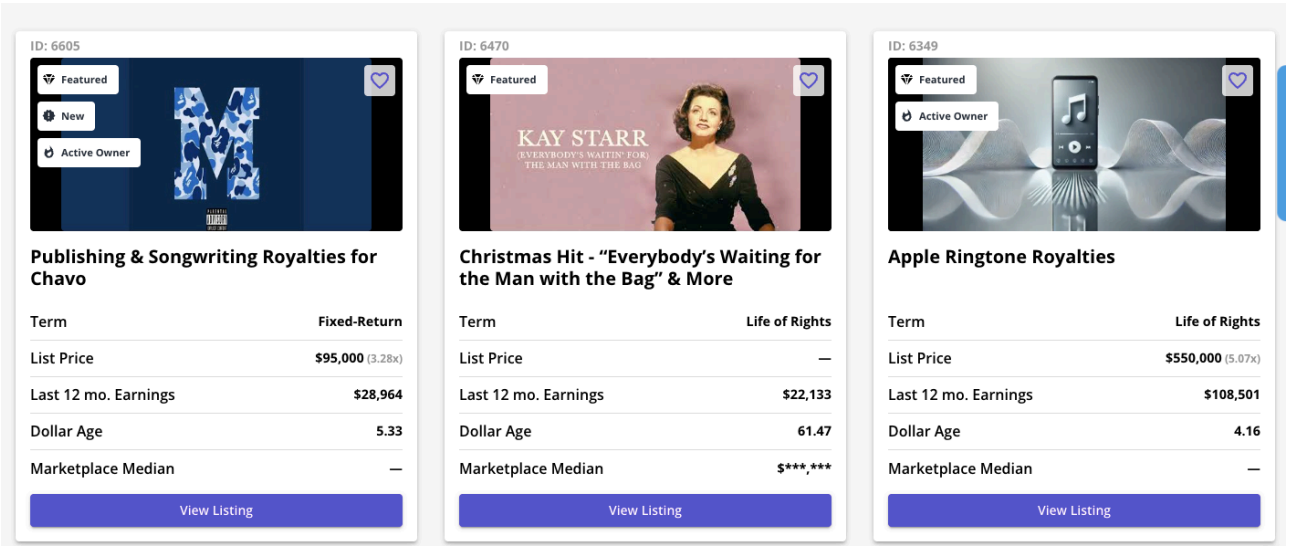
Edit with WPS Office

On desktop, the sentence “Browse the open book collections, representing the initial offering of participation rights” goes on the second line at the middle, for no reason.

Also, as in many sections on the website, before the “Open Book Collections” that green icon is not fine with the white background, is not graphically nice. I mean this one:

Please find a good solution for this in all the sections of the website.

For the slider, I want to be more like this one (but with our colors):



In our case, we can insert 2 or 3 listing per line, not sure what is the best graphic solution.

Above on the left: remove Verified and Open.

We add: Collection ID, a number identifying a collection. I think good to have, also for backend.

We Add also: “Allocation Closes In: ---countdown---” – I want the complete control to change, remove or re-start the countdown whenever I want.

Then image

Then name

The info to be included below the name should be:

Then:

- **Timeframe** (in months) – so our example “12 Months”
- **Platforms** (2 options: KDP or KDP and ACX) - so our example “KDP”
- **Gross Royalties** (In euro) – for example “€ 40,000”

Edit with WPS Office

- **Net Royalties** (In euro) – for example "€ 24,000" (as for KDP is 40,000x0,6)
- **Average Monthly Net Royalties** (In euro) – for example "€ 2,000/mo" (24,000 / 12)
- **Available Monthly Net Royalties (49%)** - for example "€ 980/mo" (as 2,000 x 0,49)
- **Available Annual Net Royalties** - for example "€ 11,760/year" (as 980 x 12)
- **Total Book Collection Value** – as it is 2,000x60 "€ 120,000"
- **Annual Net Royalty-to-Price Ratio** – here it is always "20%" (for the launch always 20%)
- **Maximum Allocation Amount** - for example "€ 59,000" (as 120,000 x 0,49%, rounded to 59,000)
- **Amount Allocated** – for example "€ 19,000" – IT MUST BE AUTOMATICALLY UPDATED ONCE THE BUYERS ACCUMULATES
- **Amount Available** – for example "€ 40,000" – IT MUST BE AUTOMATICALLY UPDATED ONCE THE BUYERS ACCUMULATES

CTA Button: **View Book Collection**

Collection Details Page

We need to change the framework of the page. First of all, please remove the spaces on the right and left a bit, it is too central from desktop. Then, the order should be:

1: Images of the books included, like this:

So in the backend, there should be a way to insert the single books images and then shown there, up to a maximum of 15 (so 5 per line, up to a maximum of 3 lines). This should be the image of each collection. Just above the images, we can insert like a label the Collection ID

2: Title (without by). For example:

18 Books • Children & Cooking • 4 Languages

The title will always be: Number of books • Topics • How many languages

Edit with WPS Office

Below the title, the 3 metrics:

- **Maximum Allocation Amount** - for example "€ 59,000"
- **Amount Allocated** – for example "€ 19,000"
- **Amount Available** – for example "€ 40,000"

Also, please note that Amount Allocated and Amount Available should be updated every time there is a new purchase.

3: "Allocation Closes In: ---countdown---"+ Participate Now. The button below is wrong, there must be 4 buttons for the 4 tiers: €1,000, €5,000, €10,000, and €50,000. TO MAKE THE TOKENS MANAGEMENT SIMPLER, WE CAN DO THAT ALWAYS 1 TOKEN = 1,000 EURO. THE BUTTON BELOW, SIMPLY IT AUTOMATICALLY "ADD TO CART" LIKE 1 Token, 5 TOKENS, 10 TOKENS, OR 50 TOKENS". THEY ARE SIMPLY MULTIPLE. SO ALSO IN THE USER DASHBOARD, THERE MULTIPLE OF 1 TOKEN OF 1K euro ALLOCATION.

Also, they should become not available automatically once the amount available changes (for example if less than 50,000 euro is the amount available, the 50,000 button should become not clickable). Also, each participation units in euro must be connected to the % of rights of total royalties. This is easy to calculate: for example 1,000 in this example is 1,000 / 120,000 = 0,83% of rights; 5,000 / 120,000 = 4,17% of rights; 10,000 / 120,000 = 8,33% of rights; 50,000 / 120,000 = 41,67% of rights. SO the buttons should be Inserted like this:

€50,000 • 50 Tokens • 41.67% of Future Royalties • €10,000 Royalties per Year at Launch*

€10,000 • 10 Tokens • 8.33% of Future Royalties • €2,000 Royalties per Year at Launch*

Etc…

Royalties per year are easy to calculate: it is the amount invested / 5.

We also add this disclaimer below:

*Actual royalties may vary based on performance. This estimate reflects historical averages over the selected timeframe.

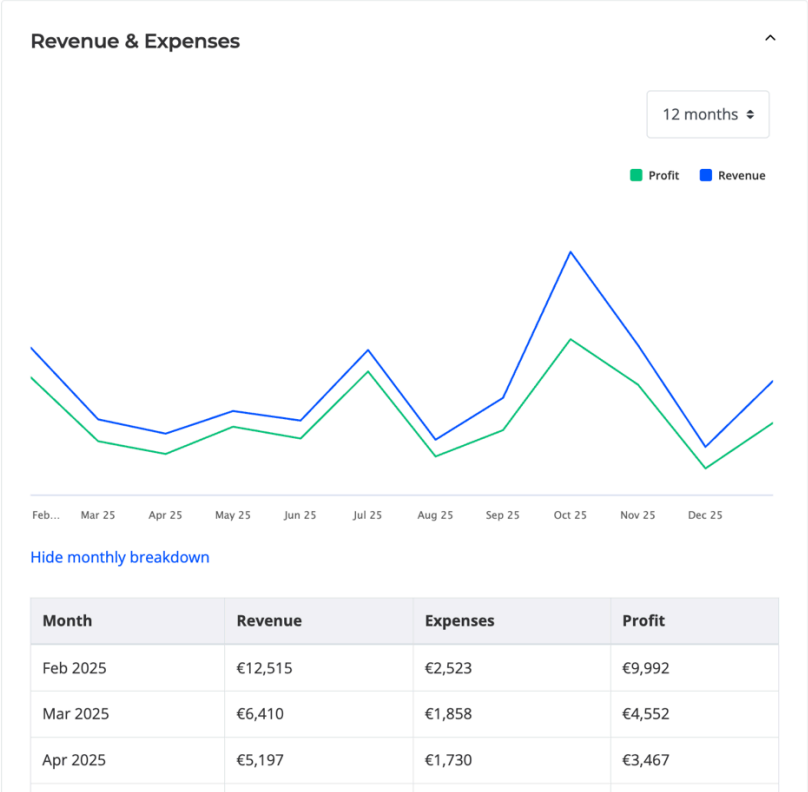
4: The call box. Button centered. Also, we should not change page once clicked. Once clicked, a pop-up should open with the process to book the call. You misunderstood as I read: You must hold tokens to book. It is the opposite, the call is for everyone, as it is the call BEFORE they decide to invest in the collection of not. So you must remove the limit they should hold the token to schedule the call.

5: The 9 metrics shown before (except the 3 of the amounts). Please try to make appear nice.

Edit with WPS Office

6: Table “Monthly Royalties (Gross and Net)”

It should appear like this:



Month	Revenue	Expenses	Profit
Feb 2025	€12,515	€2,523	€9,992
Mar 2025	€6,410	€1,858	€4,552
Apr 2025	€5,197	€1,730	€3,467

The table below should include: Month; Gross Royalties; Net Royalties.

7: About This Collection

8: Exclusive Bonuses Included

(a Box with a list of bullet points to be inserted, for example):

- Full digital access to all books in the collection (Kindle/PDF)
- 3 exclusive bonus eBooks related to the collection’s topics

9: Attachments

Download Attachments

We can make a unique button where all the attachments are downloaded in a zip file if you can make it. But this button, if a person not registered click it, it opens the popup to register.

Edit with WPS Office

10: Reviews:

What Readers Say About This Collection

Verified reviews from books included in this collection

11: Allocation Closes In: ---countdown---"+ Participate Now; and the call box again.

Buy Listed Participation Rights — Secondary Transfers

Subtitle becomes:

Browse and acquire participation rights listed for transfer by other participants.

The subtitle on desktop, on the same line (it goes to second line without reason).

No need the filter "Active, Sold or All listings". Just the active to be shown, so no filter needed on that.

Active label becomes "Available", and on top should appear also the "Collection ID"

The box of the slider should be similar of that of "Open Book Collections":

Then:

- **Image**
- **Collection Name**

Then the parameters:

- **Seller** – ex. Joao Miranda
- **Timeframe** (in months) – so our example "12 Months"
- **Platforms** (2 options: KDP or KDP and ACX) - so our example "KDP"
- **Gross Royalties** (In euro) – for example "€ 40,000"
- **Net Royalties** (In euro) – for example "€ 24,000" (as for KDP is 40,000x0,6)
- **Average Monthly Net Royalties** (In euro) – for example "€ 2,000/mo" (24,000 / 12)
- **Number of Tokens Listed –** for example here 10
- **Percentage of Future Royalties Listed** – for example 8,33%, based on what they bought

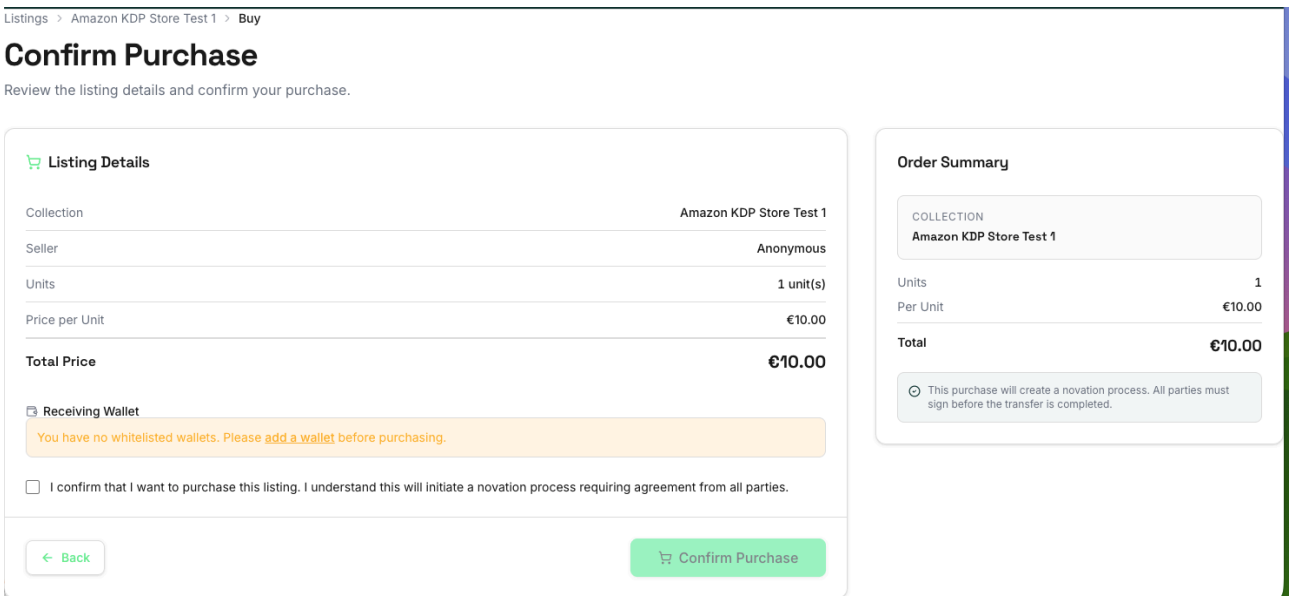
Edit with WPS Office

- **Available Monthly Net Royalties (8,33%)** - for example "€ 166.6/mo" (as 2,000 x 0,0833)
- **Available Annual Net Royalties** - for example "€ 1,999.2/year" (as 166,6 x 12)
- **Total Book Collection Value** - for example 2,000x60 "€ 120,000"
- **Proposed Price per Token** – here the owner should choose, for example € 800
- **Total Proposed Price** – here the owner should choose, for example € 8,000
- **Annual Net Royalty-to-Price Ratio** – in that case, 1.999.2 / 8,000 = 24.99%

Button Learn More: it should go to a new page, where above there are the details of the listing shown before, and below there is the collection details exactly as it was an the detail page of an open book collection.

Ok button Buy Now

When clicking the buy now:



There is no margin, letters start very close to the borders. Please adjust.

Listing details: replace with all of those shown in the slider box before.

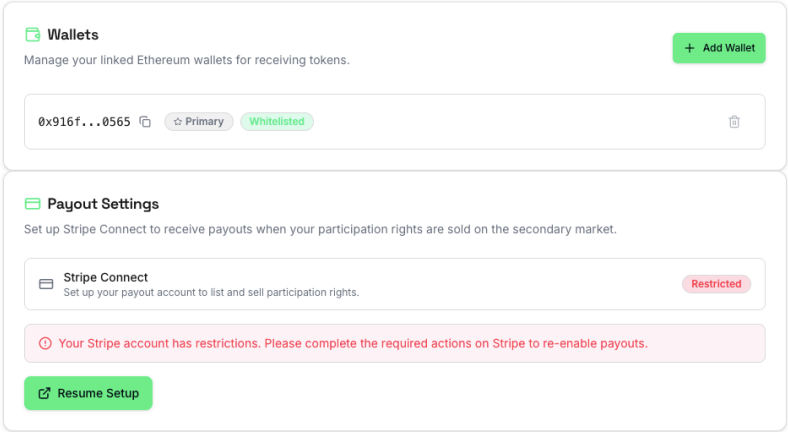
<u>User Dashboard</u>

Edit with WPS Office

Remove “Consultation” tab, no need here. A user must simply schedule a consultation directly in the collection page.

Again, the green of the icons is not good for this white background, it should be adjusted in all the website.

Here on Profile:



We agreed that royalty’s distribution can be done either by wallet or by Stripe, right? How an user can choose the preference? In any case, we need to adjust the words:

Wallets

Add a blockchain wallet to receive your tokens. You can also use it to receive royalty distributions in USDC instead of fiat via Stripe.

Don’t have a wallet or not sure what it is? No problem! With our partner WalletConnect, you can create one in just a few clicks using familiar sign-in options like Google or Facebook.

Payout Settings

Set up Stripe Connect to receive royalty distributions in fiat and payouts when your participation rights are sold through secondary transfers.

Stripe Connect

Set up your payout account.

Admin Dashboard and questions

When SumSub is used? When I click register, I don’t see it.

Edit with WPS Office

What if a user buys the rights for example of the second month on a 3-month period? The system can calculate the moment the rights become effective, that is the first day of the next month? So for example the first distribution will be of just 1 or 2 months, the system can calculate it?

Collection Creation: it must reflect all the data I have inserted before:

- **Timeframe** (in months) – so our example "12 Months" – NEED TO CHOOSE HOW MANY MONTHS
- **Platforms** (2 options: KDP or KDP and ACX) - so our example "KDP"
- **Gross Royalties** (In euro) – for example "€ 40,000" INSERTING MONTH BY MONTH, THEN THIS TOTAL IS CALCULATED
- **Net Royalties** (In euro) – for example "€ 24,000" (as for KDP is 40,000x0,6) – THIS IS EASY TO CALCULATE IF IT "ONLY KDP", IF KDP + ACX BECOMES MORE COMPLICATED
- **Average Monthly Net Royalties** (In euro) – for example "€ 2,000/mo" (24,000 / 12) – CACULATED AVERAGE
- **Available Monthly Net Royalties (49%)** - for example "€ 980/mo" (as 2,000 x 0,49) - CALCULATION
- **Available Annual Net Royalties** - for example "€ 11,760/year" (as 980 x 12) - CALCULATION
- **Total Book Collection Value** – as it is 2,000x60 "€ 120,000" – CALCULATION X60
- **Annual Net Royalty-to-Price Ratio** – here it is always "20%" (for the launch always 20%)
- **Maximum Allocation Amount** - for example "€ 59,000" (as 120,000 x 0,49%, rounded to 59,000) – here I should be inserted manually
- **Amount Allocated** – for example "€ 19,000" – IT MUST BE AUTOMATICALLY UPDATED ONCE THE BUYERS ACCUMULATES
- **Amount Available** – for example "€ 40,000" – IT MUST BE AUTOMATICALLY UPDATED ONCE THE BUYERS ACCUMULATES

Also, it must include the attachment upload file, the space to insert the string with the reviews-

Also, once the collection is closed, I need to have the possibility to change it into collections tab, as they will be listed forever in case for secondary market, with updated info.

Edit with WPS Office

Sales data: units sold should be removed. It is ok: Collection; Period Starts; Period End; Gross Royalties; Net Royalties; Notes; CSV or XLS file; Screenshots and PDFs ok.

Test Phase

In order to test with real money, something I want to do before a real listing, we need to:

- Complete all these changes
- Make that 1 token = 1 euro, e not 1,000 euro
- Remove for the moment the automatic minting (first or second of the month was automatically, let's remove and make all manually from me)
- Remove also the automatic distribution if any
- Move the platform to one my server (I use Siteground) and under the right domain

In that way I can test for example a collection with total value of 10 euro, and I make test with real purchase and distribution

Edit with WPS Office
